

Choose the best answer to the following questions.

1. Photography differs from other compositional thinking in that is:
 - a. subtractive
 - b. additive
 - c. subjective
 - d. divisive
2. In order to create a successful photograph, you should use:
 - a. a digital camera
 - b. a 35mm SLR
 - c. a point-and-shoot camera
 - d. any of the above
3. Aperture is adjusted to control:
 - a. depth of field
 - b. exposure
 - c. both A and B
 - d. none of the above
4. If one were to change their aperture setting from f/2 to f/2.8, the film or digital sensor would receive:
 - a. twice as much light
 - b. half as much light
 - c. four times as much light
 - d. none of the above
5. In relation to an aperture setting of f/2, that of f/5.6 would have:
 - a. greater depth of field
 - b. shallower depth of field
 - c. would have no effect
 - d. none of the above
6. Shutter speed can be adjusted to control:
 - a. motion
 - b. depth of field
 - c. focus
 - d. all of the above
7. If the ideal exposure for a certain subject at f/5.6 is a shutter speed of 1000, the ideal exposure of the same subject at f/8 would be:
 - a. 500
 - b. 250
 - c. 2000
 - d. 4000
8. Film speed relates to:
 - a. how fast the film advances in the camera body
 - b. how fast one can shoot successive frames to stop motion
 - c. light sensitivity
 - d. none of the above
9. In the current assignment, abstract imagery can be defined as:
 - a. representational
 - b. subjective
 - c. non-representational
 - d. emotive
10. The most dramatic natural lighting tends to occur:
 - a. in the morning
 - b. at noon
 - c. in the afternoon
 - d. both A and C
