

### WHAT ARE TABS?

Tabs are a way to join two cardboard edges to make a strong and durable structure. For the purpose of this class you need to make tabs that join or insert into each others without the use of adhesives or fasteners.

 ..... Folding line

### WHAT ARE SUPPORTS?

Supports as the name suggests are used to add extra strength to your final object, particularly flat levels that require reinforcements. You can design different kinds of support systems based on the shape and purpose of your cardboard project.
