Q: How has your thinking about digital media changed this quarter?

Participant ID#	Date	Response
399465	11/01/2005 10:58 PM	Broaden my thinking - now thinking about the pros and cons of digital media and the globalness of the field. I now am overwhelmed at how much there is to learn..I guess the more you know and learn about the something, the more you think you don't know enough. Is that a saying??
399488	11/01/2005 11:02 PM	I am relating, do I dare say see patterns, in what has gone on in past better with what is and potentially going to happen in the future. The technology might change but many things remain the same.
399507	11/01/2005 10:58 PM	I've certainly started consuming more digital media and tend to read more about anything related like podcasts and RSS feeds etc. I also make more effort to take part in technical discussions and understand what is being discussed.
399516	11/01/2005 11:11 PM	have a better conception of how to stay on the cusp. it gets harder the older you get.
399598	11/01/2005 11:36 PM	I can't say they have changed. Perhaps some of the issues and the intellectual framework has come more clearly into focus.
399989	11/02/2005 8:30 AM	sometimes after class my head hurts because i feel like there is so much out there that i don't know regarding the internet and technology and i don't know how to catch up. In the class i feel like i want to know all the "back page" stuff for everything but on the other hand i know that's impossible -- it's

		like wanting to know every step that went into building my car or why my lights come on when i flick a switch -- i have to accept that some things work because they do and i don't always need to know exactly why :)
ID# 400086	11/02/2005 9:40 AM	Primarily, it's been very educational to realize what is going on out there on the web. The way digital media empowers everybody to rise to their own potential is actually very inspiring, and fascinating.
ID# 402137	11/02/2005 8:14 PM	
ID# 402211	11/02/2005 9:07 PM	My understanding that critical mass is just being achieved in a great many areas of digital media is something I never knew. I thought that I was late on some developments but it turns out I was just going with the flow. I guess the fact that I only learned about RSS 6 months ago is an example of that. With this program, I feel like the knowledge I'm gaining is catapulting me ahead!
ID# 404543	11/03/2005 2:27 AM	I started feeling a bit intimidated about the digital world, but the more I immerse myself into it and read the history and trends and talk to my peers, the more confident I feel.
ID# 410303	11/04/2005 11:44 PM	It can be a very empowering tool and will continue to shape social behavior for a long time. I have a better appreciation of the effort that it has taken to get digital media to the level that it currently is at.

Q: How effective was the shared reading and discussion of Friedman?

Participant ID#	Date	Response
399465	11/01/2005 10:58 PM	I thought the presentations were great tonight and very effective to explain Friedman's flatteners. For some reason, the assignment had me confused. The readings webpage assignment said, "Each group will present a summary of their "flatteners" and be prepared to lead a short discussion (~15 minutes) of their material. We will have some class time for groups to formulate their strategies, learnings, but some pre-conferencing (IM, e-mail, etc) is advised. Someone from each group should be assigned the role of recorder and should post a summary of the reading/learnings to the class blog by 6 pm Friday." My group thought it would be like the other weeks - we would have time in class to gather our thoughts and points. We were a bit stressed, but it's turned out okay. Are we suppose to do a personal blog this week? Is one member of our group enough for the class blog or are we suppose to all write one. I ask since I saw tonight multiple blogs from difft groups.
399488	11/01/2005 11:02 PM	It was good, especially with the global cross section of students in class. Getting the international students perspective on globalization is very important and this method helped that greatly.
399507	11/01/2005 10:58 PM	It's a great book and topic for discussion. Wish we had more time - there are just so many issues that have been brought up and we've

		only touched the tip of the iceberg. I think it would have helped to have supplemental reading like a Postman point of view.
ID# 399516	11/01/2005 11:11 PM	useful way of doing the work. but I'm reading the whole book anyway, cuz it's good stuff.
ID# 399598	11/01/2005 11:36 PM	As the quarter has unfolded I have found it gives us an important common ground for discussion. It has afforded us a safe intelectual environment where we can explore our cultural differences and diverse points of view.
ID# 399989	11/02/2005 8:30 AM	
ID# 400086	11/02/2005 9:40 AM	Having actually read the through all of the flatteners, I think the groups did a really good job presenting on his points. It was a useful, effective way to efficiently cover a lot of material.
ID# 402137	11/02/2005 8:14 PM	
ID# 402211	11/02/2005 9:07 PM	LOVED it! Very engaging. I wish we had more time to have open discussion after each group.
ID# 404543	11/03/2005 2:27 AM	It was awesome! I loved it and am looking forward to other group presentations. I think I learn a lot from my peers. It is great to have such diverse views and ideas.
ID# 410303	11/04/2005 11:44 PM	This was the most enjoyable evening thus far.

Q: What are the main areas you would like to concentrate on for the remainder of the quarter?

Participant ID#	Date	Response
399465	11/01/2005 10:58 PM	Remainder of the qtr is 3-4 weeks? I need to concentrate on my papers! Can't believe we have 30 pages of writing due in 4 weeks!! Not use to the short qtr system...
399488	11/01/2005 11:02 PM	
399507	11/01/2005 10:58 PM	Learning some technical skills, at the same time continuing with group/ class discussions on social effects of media and technology.
399516	11/01/2005 11:11 PM	application of trends -- current movement with historical context, research for my paper
399598	11/01/2005 11:36 PM	
399989	11/02/2005 8:30 AM	
400086	11/02/2005 9:40 AM	At this moment, writing my papers is what I'm sure I'll be concentrating on for the rest of the quarter. The class and lecture topics aren't something I would want to bias one way or the other. I'm just really enjoying the in class material.
402137	11/02/2005 8:14 PM	
402211	11/02/2005 9:07 PM	I would like to like to concentrate on mobile technology.
404543	11/03/2005 2:27 AM	I would like more hands on media experience and some lab work where I can get my hands dirty with tech programs/tools. Also, I hope we learn something about online content creation. How to go about creating/producing content for the Web.
410303	11/04/2005 11:44 PM	What's next with digital media? I am still focused on that.

Q: Is there anything else you'd like me to know, here at mid-quarter?

Participant ID#	Date	Response
399465	11/01/2005 10:58 PM	I think a hardcopy syllabus at the beginning of the qtr with the readings and assignments each week would be good, so there aren't changes to the class structure throughout the qtr.
399488	11/01/2005 11:02 PM	
399507	11/01/2005 10:58 PM	Love the class and the interactivity!! Thanks for your effort in making this an enjoyable quarter.
399516	11/01/2005 11:11 PM	
399598	11/01/2005 11:36 PM	
399989	11/02/2005 8:30 AM	
400086	11/02/2005 9:40 AM	
402137	11/02/2005 8:14 PM	
402211	11/02/2005 9:07 PM	We're at mid-quarter! How did that happen?! The fast pace has made the quarter go quickly. I sometimes wish we had more time to ruminate over things.
404543	11/03/2005 2:27 AM	You are a great teacher and I like your innovative teaching methods in class. Also, can you please suggest any UW writing classes that help with sharpening analytical and organizational abilities for writing term papers?
410303	11/04/2005 11:44 PM	I am just scrambling to stay caught up. Having a hard time.
