Speaker - Chris - Fall2005

Matrix - one answer per row (button)

Q:

Row 1: The presentation was well organized.

Response	# of responses	% of participants
1: 1	3	27.27%
2: 2	1	9.09%
3: 3	3	27.27%
4: 4	4	36.36%
5: 5	0	0.00%

Row 2: The content was appropriate for this audience.

Response	# of responses	% of participants
1: 1	1	9.09%
2: 2	0	0.00%
3: 3	1	9.09%
4: 4	7	63.64%
5: 5	2	18.18%

Row 3: The conclusions were supported by the material.

Response	# of responses	% of participants
1: 1	0	0.00%
2: 2	4	36.36%
3: 3	4	36.36%
4: 4	2	18.18%
5: 5	1	9.09%

Row 4: The speaker used clear language, vocal variety and good eye contact.

Response	# of responses	% of participants
1: 1	0	0.00%
2: 2	4	36.36%
3: 3	4	36.36%
4: 4	2	18.18%
5: 5	1	9.09%

Q: Additional comments:

Participant ID#	Date	Response
399465	11/01/2005 10:58 PM	Chris brought so much enthusiasm to the class when he presented about his history in the digital media field and now with his project onn the RSS feed. Really interesting! never heard of RSS feed and now excited to look into it!
399488	11/01/2005 11:02 PM	Great topic, just needed to be better organized, clearer examples, and a more defined conclusion or "here is the point I'm trying to make with all of this" statement.
399507	11/01/2005 10:58 PM	It would have helped to have a pre-presenter brief about the topic and what it means, does, can do. That would have helped all of us be on the same page and think of questions to ask.
399516	11/01/2005 11:11 PM	I wasn't clear for a while what his topic was. Then when I saw the topic listed on the class site, I had an even better idea. a good preface would have been excellent.
399598	11/01/2005 11:36 PM	Chris has some very important points to make. His point of view is truly enlightening. But it struck me that he was jsut winging it. I would have preferred a little more structure and focus to what he presented. I would consider bringing him back because he presents information that represents the future of our industry.
399989	11/02/2005 8:30 AM	i think to some extent he was talking down to the class -- like everything he was saying was new to us. To me that was fine because i didn't know a lot about what he

		was saying and i wasn't on the internet back in 92 but there are a lot of people in the class that were and so sometimes he sounded a little trite
ID# 400086	11/02/2005 9:40 AM	It was great to hear Chris's enthusiasm for digital community, and to jot down the many sites and resources he mentioned for further study. He definitely seems like a person who does not easily suffer from information overload.
ID# 402137	11/02/2005 8:14 PM	
ID# 402211	11/02/2005 9:07 PM	Chris obviously is very knowledgeable in his subject area. More structure in his presentation and a clear conclusion would have been helpful.
ID# 404543	11/03/2005 2:27 AM	The speaker assumed all students had sufficient background about RSS. He failed to give a broad overview of the technology and used some jargon that made my head spin. For example, I have no idea what 'Thunderbird' is? Is it a news aggregator or a Mac feature? The speaker was very enthusiastic and knowledgeable about the subject, but not a very good teacher or speaker. I feel I haven't understood RSS as yet.
ID# 410303	11/04/2005 11:44 PM	I felt that Pirillo was all over the place and I didn't enjoy it very much. I never did learn how he actually makes his living. Is it through his blog?
