## Object Design

### Spaceship

## Spaceport

The spaceport has five spokes that each have a transform around the pivot rotated at  $(365 / 5) * n$  degrees. The end of each spoke has another pivot where the Dock spins 360 degrees constantly.

## Known Bugs

- Wall collisions are imperfect
- User can teleport spaceship outside of the world bounds
- Clock does not stop after winning the game

## Limitations

- Currently only supports one level

## Features for the Next Version

- Multiple levels
- Moving walls
- Asteroid spawns
- Powerups

- More Teleports
  - Different Gun Types
- Obstacles in the maze
