GAME OVERVIEW

Game logline

Zombies need love too!

Game-play synopsis

Zombie Love is a shoot 'em up game, where the player tries to make zombies happy by shooting hearts at them. The game style is cartoony, and the level of game-play ranges from very easy, to hardcore.

GAME DETAILS

Description

In the year 2013, a deadly virus has turned most humans into angry, raging zombies. Lilly, a young girl wise beyond her years, was separated from her brother over a year ago, unable to gain passage to him because of the dangerous zombies. Unable to accept the fact that she may never see her brother again, she spent many months researching a way to fend the zombies off without hurting them.

Eventually, she discovered a way to temporarily tame zombies, and in some cases convert them into beings that are capable of loving others. It is often thought that zombies are creatures without feelings, but after watching a zombie stomp on a giant slug in her yard one day, she noticed how it seemed noticeably happier after the fact.

Now, by sending magical hearts full of love towards zombies, Lilly can actually project emotions into them, making them happy, kind creatures. And so the quest to reunite with her brother begins.

Game genre?

Shoot em up vertical scroller.

Is this single-player or multiplayer game?

~~Single~~ Single to Two-Player

Is this 2D or 3D?

2D

Where does the game take place? (world)

The game begins at Lilly's house in Washington and moves around various parts of the state including forests, snowy mountains, ~~meadows, and cities~~, neighborhoods, and valleys.

What do I control? How many characters? Can I use vehicles?

~~The player controls Lilly.~~ There are no vehicles. Lilly does not know how to drive.

In one player mode, the player will control only Lilly. In two player mode, Lilly's dog "Doggy" helps her on her journey.

Left thumb-stick controls where Lilly and Doggy moves. Right thumb-stick controls the direction of shooting, ~~trigger buttons control specials (bombs, power-ups)~~. Y button controls shields, B button controls love bombs, A button controls resurrection. Start button pauses the game.

What is the main focus?

Finding Lilly's brother without getting turned into a zombie. (Zombies ~~breath~~ spit on Lilly - which increases the chance of the zombie virus overtaking her immune system). Kelvin, the final boss, throws zombie-spit-covered books at the player.

How long the game lasts? Or how long game matches last?

The game lasts about 15 minutes, depending on the difficulty level. Insane mode will probably take longer, because the player will ~~die~~ get turned into a zombie so many times.

Comparison

Tyrian: <http://www.youtube.com/watch?v=tQdu4NsWU4Y>

It has the same goals, and game mechanics, except it is much more violent.

Robo Aleste: <http://www.youtube.com/watch?v=ysGcn3339-8>

Again, somewhat similar mechanics.

Plants VS Zombies: <http://www.youtube.com/watch?v=Al56hV52pns>

Art style will be similar - cute and cartoony.

What is unique?

Most shoot em up games focus on killing, but our game focuses on making enemies happy, and in some cases, these enemies will become your friends and fight alongside with you. ~~Also, our game will have a bonus zombie mode, where players can play as a zombie that is trying to infect as many humans with the zombie virus as possible.~~

Why create this game?

Because zombies are very popular, but seldom is there a zombie game made that is actually appropriate for all audiences. Also we love zombies. What better way to show it?
