---

---

---

---

---

---

---

---

---

## 20th Century Mortality

Exhibit 4-4: Causes of death, United States, 1900 and 1998

1 Other causes may include typhoid fever, measles, homicide, suicide, syphilis, and diabetes.  
 2 Includes cirrhosis.  
 3 Other causes include both motor vehicle accidents, AIDS/HIV, cystic fibrosis, Alzheimer's disease, and Parkinson's disease.

Source: CDC, National Center for Chronic Disease Prevention and Health Promotion, Behavioral Risk Factor Surveillance System, *Reducing the Burden of Chronic Disease*, November 2003. Data for 1990 from U.S. Bureau of the Census; data for 1998 from National Center for Health Statistics.

### Fundamental Rules

1. "The Dose Makes the Poison"

*"All substances are poisons.  
There are none that are not.  
The dose separates the  
remedy from the poison."*

Paracelsus  
(Theophrastus Bombastus von Hohenheim,  
1493-1541)

ENVIR 202: Lesson 19 7

---

---

---

---

---

---

---

---

### Fundamental Rules

2. Exposure must occur for the chemical to present a risk

3. The magnitude of risks is proportional to both the *potency* of the chemical and the *extent* of exposure

**Risk = Hazard x Exposure**

ENVIR 202: Lesson 19 8

---

---

---

---

---

---

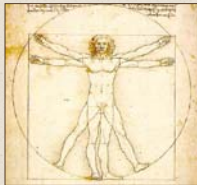

---

---

### Routes of Exposure

1. **Direct Exposure**  
(through Use and/or Accident)

- a) **Ingestion**  
(children; intentional)
- b) **Skin contact**  
(e.g., acids, solvents, pesticides)
- c) **Inhalation**  
(e.g., paints, pesticides)

ENVIR 202: Lesson 19 9

---

---

---

---

---

---

---

---

## Exposure Routes Continued

**2. Indirect Exposure**

- a) Contamination of drinking water
- b) Contamination of soil / house dust
- c) Contamination of indoor air

ENVR 202: Lesson 19 10

---

---

---

---

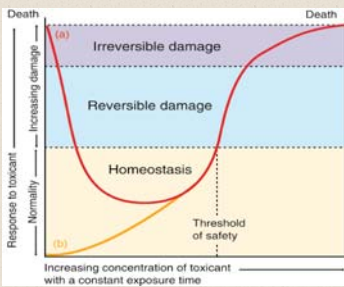

---

---

---

---

## Dose-Response Relationship

The "individual", or continuous, dose-response curve

ENVR 202: Lesson 19 11

---

---

---

---

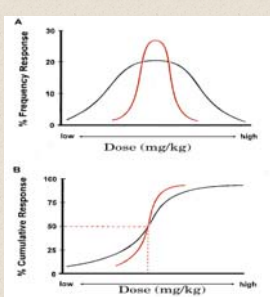

---

---

---

---

## Dose-Response Relationship

The Frequency Distribution Curve

ENVR 202: Lesson 19 12

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

### LD<sub>50</sub> of Representative Substances

TOXIC AGENT	LD 50	TOXICITY RATING
Ethanol	10,000	Slightly Toxic
Sodium chloride	4,000	Moderately Toxic
Phenobarbital	150	Very Toxic
DDT	100	Very Toxic
Parathion	7	Extremely Toxic
Nicotine	1	Super Toxic
Curare	0.05	Super Toxic
Dioxin (TCDD)	0.001	Super Toxic
Botulinum Toxin	.00001	Super Toxic

---

---

---

---

---

---

---

---

### Chemical Interactions

- ◆ Additive:  $2 + 3 = 5$
- ◆ Synergistic:  $2 + 3 = 20$
- ◆ Potentiation:  $0 + 2 = 10$
- ◆ Antagonism:  $4 + 6 = 8$   
 $4 + (-4) = 0$   
 $4 + 0 = 1$

ENVR 202: Lesson 19 15

---

---

---

---

---

---

---

---

### Risk Assessment

ENVIR 202: Lesson 19 16

---

---

---

---

---

---

---

---

### Understanding Risks

- ❖ Hazard identification
- ❖ Dose-response assessment
- ❖ Exposure assessment
- ❖ Risk Characterization

---

- ❖ Risk Management
- ❖ Risk Communications

ENVIR 202: Lesson 19 17

---

---

---

---

---

---

---

---

### Translation

- ❖ Is there a potential problem?
- ❖ What is the problem?
- ❖ Who has the problem?
- ❖ How bad is the problem?

---

- ❖ What should we do about it?
- ❖ Who and what do we tell?

ENVIR 202: Lesson 19 18

---

---

---

---

---

---

---

---

### Toxicological Methods

The slide features a dark blue background with several icons: a chemical structure of benzene rings, a petri dish containing a culture of small organisms, a grey mouse, and a yellow human silhouette. The text 'Toxicological Methods' is at the top in green. At the bottom left, it says 'ENVIR 202: Lesson 19' and at the bottom right, the number '19'.

---

---

---

---

---

---

---

---

### Comparing Risks

- ❖ Probability
- ❖ Expected Value
- ❖ Exposure
- ❖ Outrage
- ❖ Experts
- ❖ Avoidance

ENVIR 202: Lesson 19 20

---

---

---

---

---

---

---

---

### Uncertainties in Life

*“One of the brightest gems in the New England weather is the dazzling uncertainty of it.”*  
... Mark Twain

ENVIR 202: Lesson 19 21

---

---

---

---

---

---

---

---

### Comparative Risks

Event	Annual Risk
Car injury	1:100
Killed hang gliding	1:1,000
Killed mountain climbing	1:1,585
Cancer: 1 diet cola/day	1:10,000
Cancer: 4 tbsp. peanut butter/day	1:100,000

Event	Lifetime Risk
Hit by Lightning	1:631,000
Cancer: drinking chlorinated water	1:1,000,000
Win state lottery grand prize	1:10,000,000
Win Readers Digest sweepstake	1:250,000,000

ENVIR 202: Lesson 19 22

---

---

---

---

---

---

---

---

### Comparing Risks

❖ Activities that increase annual risk by 1:1,000,000

- Smoke 1.4 cigarettes
- Drink 0.5 liters of wine
- Live 2 days in New York or Boston
- Live 2 months with a cigarette smoker
- Live 150 years within 5 miles of a nuclear power plant

ENVIR 202: Lesson 19 23

---

---

---

---

---

---

---

---

### Comparing Risks

- ❖ Voluntary vs. Involuntary Risks
- ❖ Immediate vs. Delayed Effects
- ❖ Common vs. Rare (Dread) Events
- ❖ Affects Everyone vs. Special Groups
- ❖ Reversible vs. Irreversible Effects

ENVIR 202: Lesson 19 24

---

---

---

---

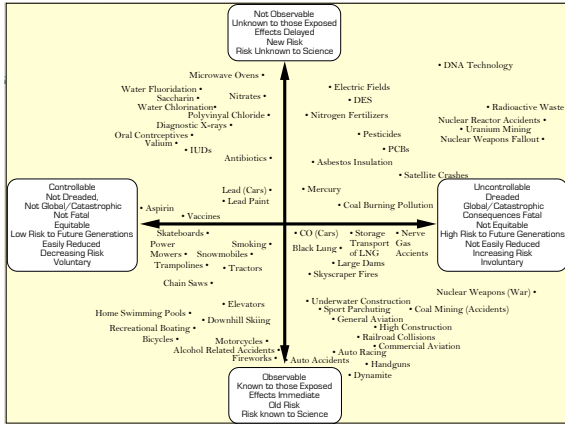

---

---

---

---

---

---

---

---

---

---

---

---

### Changing Risks

- ❖ Understand the risks
- ❖ Understand who is at risk
- ❖ Characterize the risk
- ❖ Consider the alternatives
- ❖ Consider “protective” measures
- ❖ ACT!!!

ENVIR 202: Lesson 19 26

---

---

---

---

---

---

---

---

### Risk Assessment Approaches

- ❖ Cost-benefit analysis
- ❖ Revealed preference
- ❖ Expressed preference
- ❖ Natural standards

ENVIR 202: Lesson 19 27

---

---

---

---

---

---

---

---

## Cost-Benefit Analysis

**Definition:** A systematic attempt to compare the costs with the anticipated benefits of a technology, product, substance or process.

ENVIR 202: Lesson 19 28

---

---

---

---

---

---

---

---

## Cost-Benefit Analysis

### "Veg-E-Wax"

Benefits	Anticipated Value
Storage loss prevented	1,000,000
Nutritive value preserved	800,000
<b>Total</b>	<b>\$1,800,000</b>

Costs	Anticipated Value
Application costs	100,000
Cancer in workers	100,000
Cancer in consumers	100,000
Unappealing appearance	1,600,000
<b>Total</b>	<b>\$1,900,000</b>

ENVIR 202: Lesson 19 29

---

---

---

---

---

---

---

---

## Cost-Benefit Analysis

### Examples of Regulations Evaluated by Cost per Life Saved

Regulation	Status & Year	Annual Risk Estimate	Lives Saved Annually	Cost per Life Saved
Asbestos	Final 1972	4 in 10 <sup>4</sup>	296	\$7,400
Benzene	Final 1984	9 in 10 <sup>4</sup>	4	\$17,100
Asbestos	Final 1978	2 in 10 <sup>3</sup>	12	\$92,500
Formaldehyde	Prop. 1983	7 in 10 <sup>7</sup>	<1	\$72,000,000

ENVIR 202: Lesson 19 30

---

---

---

---

---

---

---

---

### Revealed Preferences

**Definition:** The acceptable risk for a new technology is the level of safety associated with ongoing activities having similar benefits to society.

ENVIR 202: Lesson 19 31

---

---

---

---

---

---

---

---

### Expressed Preferences

**Definition:** If people say it is safe, then it is safe enough.

ENVIR 202: Lesson 19 32

---

---

---

---

---

---

---

---

### Natural Standards

**Definition:** A technology is safe if its risk are no greater than those accompanying the development of the human species.

ENVIR 202: Lesson 19 33

---

---

---

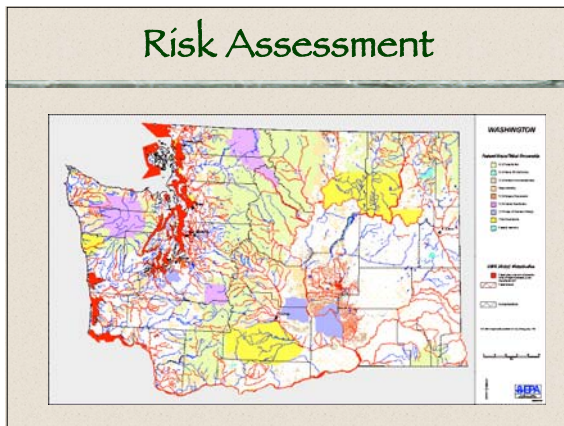

---

---

---

---

---

---

---

---

---

---

---

---

---

- ### Regulation Philosophies
- ❖ Count the bodies
  - ❖ Engineering solutions (BAT)
  - ❖ Uniform Risk/Equal Rights
  - ❖ Cost-Benefit
  - ❖ Delaney Approach
- ENVIR 202: Lesson 19 35

---

---

---

---

---

---

---

---

- ### Current Federal Issues
- ❖ Risk and Regulation
  - ❖ Cost-Benefit Analysis
- ENVIR 202: Lesson 19 36
