

Plant Propagation Protocols – Grading Rubric

ESRM 412 – Native Plant Production

Spring 2009

JD Bakker

Item	Grade Range
Taxonomy section	0-2
General Information section	0-3
Propagation Details section	0-10
Grammar and spelling	0-5
Adequate primary sources (≥ 10)?	0-5
Information properly cited?	0-5
Followed format outlined in template?	0-3
PDF?	0-1
Include original protocol?	0-1 (1 for new protocols)
Late Penalty	-3 per day
Total	0-35

If you wish, you may revise a graded protocol to:

- Incorporate new information that you've found while completing your other protocols
- Address shortcomings in your original submission

Resubmissions will be regraded. Your grade for the protocol can be increased by up to half of the difference between your original grade and the maximum total (35). For example, if you received 25/35 on the original submission, the maximum you can receive after the resubmission is an additional 5 points (half of 10), or 30/35.
