

**ESS 203 *Glaciers and Global Change* Winter 2020**  
**Monday January 06**

**Writing assignment due on Wednesday January 08:**

- (a) Describe two things that you learned today about glaciers. (If you did not learn something new, you can find 2 things by looking up "glaciers" on the web or in an encyclopedia. But, do not cut-and-paste!).
- (b) What is one thing that you want to know about glaciers but don't (yet)?

To keep it easy, please do not exceed 1 paragraph or 1/2 page. Thanks!

**2. Class Questionnaire:**

I have given you a Questionnaire so I can learn more about your backgrounds and interests. If you didn't get a copy in class, you can download it from the class page under the QUESTIONNAIRES tab.

- Please return your Questionnaire by Friday. Thanks.

**3. Reading:**

During the next week or so, we will be asking "*What is a Glacier?*"

- Please read the wikipedia entry for *Glacier*, particularly the sections **Types**, **Formation**, **Structure**, and **Motion**.
