

**ESS 203 *Glaciers and Global Change* Winter 2020**  
**Friday February 28**

**Assignment due on Monday March 2:**

It's time to start reading some peer-reviewed papers. Please read the *Science* paper posted on the class web site (READINGS tab):

Oerlemans, *Quantifying Global Warming from Retreat of Glaciers*.

In prose, (a page or less) answer ***The 3 Questions***.

- 1) What is the question that the paper tries to answer?
- 2) What is the answer (according to the authors)?
- 3) What points are still unclear to you?

In class this week we looked at how glacier size can give information about climate changes. This is what Oerlemans did.

***Bring your copy of the Oerlemans Science paper (digital or hard copy) to class on Monday, so that you can discuss it with Group partners.***
