

MID AND LONG TERM

SHOP FRONT IMAGES AND USES

Use sidewalks as a Flexible Zone that can be used for market, art and event activities.

ORDINARY USE (SEATABLE BAR)

ALTERNATIVE 1: Keeping Parking Lanes + Wide Shop

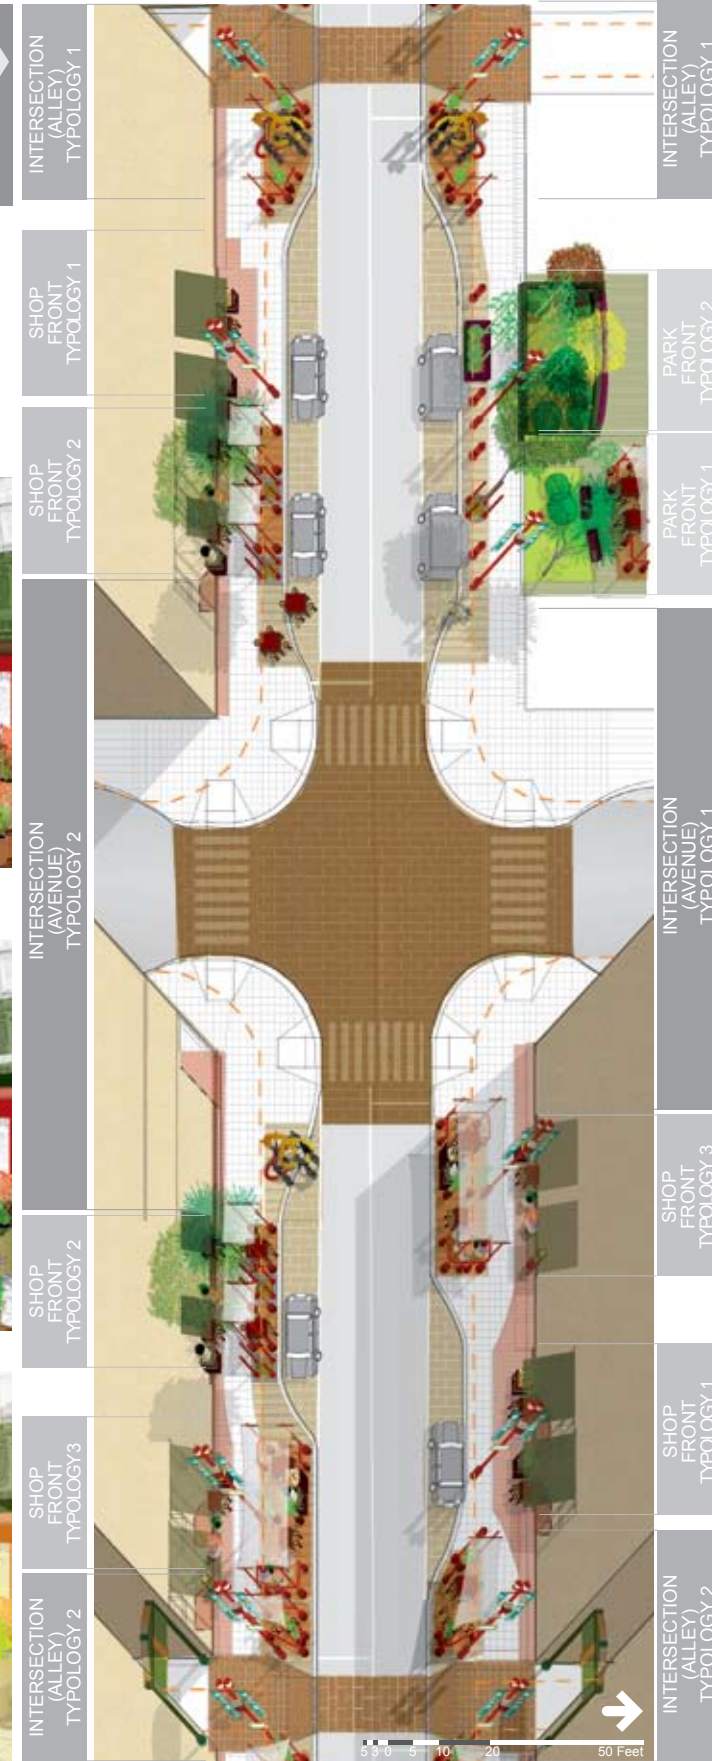

ALTERNATIVE 2: Keeping Parking Lanes + Flexible Use + Trees

ALTERNATIVE 3: Using Parking Lanes + Flexible

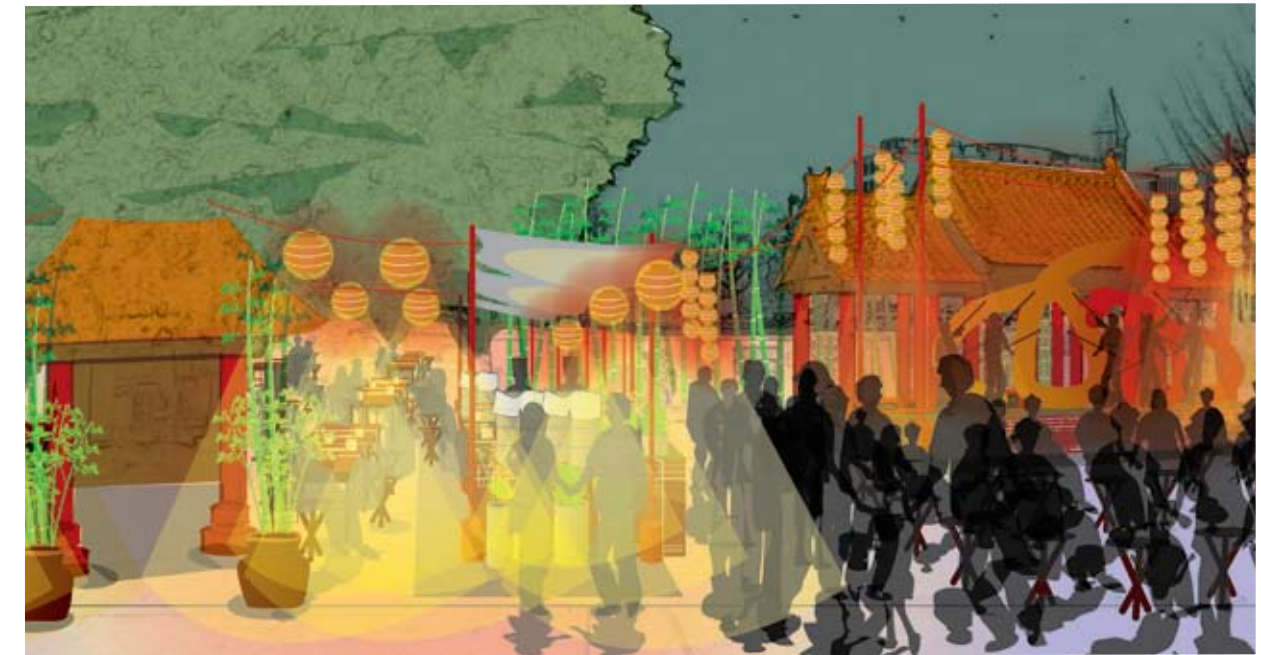

SAMPLE SCENARIO

KING STREET VISION PROJECT

CHINATOWN king street
Enhancing Pedestrian Experiences

Hing Hay Park Image in Short Term Phase: Prospered with Events and Night Markets

Street Typical Section in Long Term Phase: Allowing for Flexible Use Responding to Contexts

This project is intended to enhance the pedestrian experiences on King Street through activities and designs. The specific goals of our project are to: (1) highlight the cultural and historical value; (2) encourage commercial activities and pedestrian movement; (3) maintain economical sustainability, and; (4) create flexible and multifunctional space, based on assets of the community. Overall improvements of street designs require both short-term and mid/ long-term strategies. The short-term phase aims at activating diverse cultural, traditional and commercial events along the street and encouraging pedestrian activities by introducing flexible street furniture. The mid/long-term phase involves expanding the existing sidewalks and other permanent enhancements.
