General instructions for homework assignments

You may work with a partner on the homework. If you work with someone, homework teams must be different for each homework assignment. Only one assignment is uploaded per pair.

Unless you are working in a team, you should work independently of other students on both the analysis and write-up of the problem.

Think of your homework as an essay. You should write in complete sentences. Your work must be typed. If you don't yet have a good phonetic font, I recommend the Charis SIL phonetic font (see syllabus). Do not use any type smaller than 12 points anywhere in your document.

Double line-spacing within your document makes it easier for me to make comments on your work. However, material within tables does not need to be double-spaced.

Write your name(s) on your paper (within your document).

Save your file as a .pdf. Name your file "lastname(_lastname).pdf". (You do not need (_lastname) unless you are submitting one assignment for two people.)

All homework must be submitted to the collection site. Homework cannot be submitted to me as an e-mail attachment. Late homework *may* be accepted but will be penalized 10% per hour turned in late.
