

Errors in Chapter 12:

Pgs 595: An equation that represents the simply-supported boundary condition along a panel edge appears near the middle of this page. The negative algebraic sign that appears in front of the $2D_{16}$ term is incorrect. The corrected equation is:

$$D_{11} \frac{\partial^2 w}{\partial x^2} + D_{12} \frac{\partial^2 w}{\partial y^2} + 2D_{16} \frac{\partial^2 w}{\partial x \partial y} = M_{xx}^* = 0$$
