

Lecture 26

Thursday, June 05, 2008
9:30 PM

Course Notes:

1. Extra Credit Assignment:

- For the extra credit presentations, the schedule of presentations is posted on the website
- There are 4 sessions -- 1 on Friday evening, and 3 on Saturday
- Remember, for full credit you are expected to attend all of the presentations in your session
- Please print out a copy of your presentation for me -- I'm going to use that to write notes while you are presenting
- Bring your presentation on a memory stick -- I'll have my computer
- I have MS Office 2003 -- make sure you save in 2003 or earlier format
- Make sure your sticks are clean -- DON'T give me a virus
- I'm going to unlock the doors right outside the building on the front side.

2. Final:

- 50 questions
- Multiple choice and true and false
- We will be using scantrons -- we will provide
- You may bring a 4x6 card with equations and constants -- you are going to have to turn it in
- It does cover material from the entire quarter

Review:

- Last time Peter did an excellent job of presenting some demonstrations of the properties of plastics
- This time we are going to talk briefly about composites about a 1/2 lecture. We'll use the last 20 minutes for course evaluations.
- The class was in a new format this quarter so constructive feedback is very welcome -- particularly about the lab.

Rest of Lecture is available in PowerPoint Presentation Paired with Lecture 24
