Beth

Lindsay

Dema

Suzie, Grad TA

Laura, Peer TA

Pied-billed Grebes with young chicks!

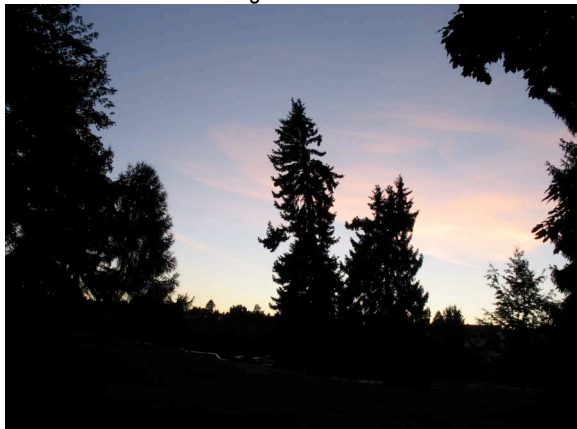

The grebe's floating nest is the brown spot in the lily pads.

Folks from Bats Northwest introduced kids to the bats.

Sunset in the clearing where we watched the bats.

Species List for Greenlake Field Trip on Aug. 13, 2008

(Hot day & lots of people seemed to discourage the birds, but the bats were numerous & awesome!)

To learn more about bats, go to: <http://www.batsnorthwest.org/>

To hear some bat calls & see their sonograms:
