Assignment #1

Of the players we consider this week, choose one and discuss its level of success in forwarding an environmental agenda.

How would you measure success for your chosen player?

Give examples of issues on which progress has been made and contrast this with issues on which no progress has been made.

Explain these results in light of this player’s role.

You will need to 1) choose a particular Congress, NGO, etc. 2) be explicit about the nature of their agenda in order to answer this question with enough substance.
