Assignment #4

Choose one stakeholder (public, NGOs, US government, some international body such as UN or another country’s government, scientists, media, etc.) in the climate policy process and lay out that stakeholders:

Role and agenda with respect to the issue, goals, rights, responsibilities, and sources of power in the policy process. What progress has this player made in pursuing its agenda to date? What actions and options are not available to stakeholder in the process? Lay out the barriers that this player faces in pursuing its agenda. What would motivate this stakeholder to make additional progress? What does this stakeholder want from other stakeholders? What do other stakeholders want from your stakeholder?
