Projects Recommended for Early Implementation
Projects that address an immediate need, for which an agreed upon solution has been developed and that should be constructed as soon as possible.

A. Park Entrance Improvements
- Create a safe and inviting path for pedestrians along 20th Avenue N.W.
- Provide a new park entrance sign and perhaps a pony or similar landmark.
- Create a landscaped median at the park entrance to slow down vehicles and improve safety for pedestrians.
- Provide an overlook with seating at the top of the bluff.

B. Park Road Improvements
- Stabilize the existing roadway.
- Control drainage and surface water runoff by sloping the road toward a curb at the hillside.
- Provide a parallel pedestrian path on the outside of the roadway with bollards to separate the path from the driving surface.
- Provide a defined edge to the path to control access to fragile steep slopes.
- Make the roadway wide enough in a few places to accommodate overflow parallel parking.

C. Steep Slope Stairs and Trails
- Control access to steep fragile slopes to reduce erosion and protect vegetation.
- Improve connections to facilitate access across steep slopes by construction steps.

D. Steep Slope Stabilization
- Implement a program of removing invasive plants and replacing them with dune grass and other native plant species tolerant of dry, sandy and gravelly soils.
- Create a community participation program to involve volunteers in this effort, to be coordinated by a city staff person.
- Work with the University of Washington Restoration Ecology Network in this program.

E. Bridge Safety and Appearance
- Consider aesthetic and safety improvements to the existing bridge, such as a new walking surface, new fencing and guard rails and paint.
- Explore cost effective ways to improve access gradients at both ends of the bridge.

F. Beach Wash-Down Area
- Provide a convenient and accessible facility for washing adjacent to the beach.
- Provide an outdoor shower and hose connection.
- Provide a bench or platform to place cleaned equipment.
- Control drainage and runoff.
