Grading

Each homework assignment will be given a specified number of points. Up to 30% additional points may be given for outstanding work. No redos will be permitted and late homework will not be accepted. The project grade will be weighted: 75% on technical content; 25% on presentation. The course grade will be based on: 40% on the homework; 40% on the project (or the final), 20% on the midterm. Obtaining approximately an overall score of 70% will yield a grade of 3.0.

Project Presentation: Students not taking the final must be present at the project presentations. Each student will evaluate the presentations on technical content and presentation. Grades will be assigned to these evaluations and will count towards the class grade.
