Course Objectives:

1. Review and gain experience in medical and problem history-taking skills.

2. List implications of medical conditions and medications in patients who have been examined by the student.

3. Review and gain experience in physical examination and interpretation techniques.

4. Gain experience in communication skills with patients, professional colleagues and clinical support staff.

Course Requirements:

1. Attendance at all 3 sessions.

2. Three written assignments; each consists of a short summary of your patient which includes purpose of visit, medical history and medications (with dental implications) and description of the visit activities. A form to complete will be provided.

Grading is Credit / No Credit. “Credit” is meeting all requirements.
