1. What is the major hypothesis being tested by this paper?

2. In Figure 2A, what variable is plotted? What does this result mean?

3. What does Figure 2C illustrate?

4. What is shown in the photomicrographs in Figure 3? What is the point of this illustration?

5. Are the authors suggesting that IBO treatment might be useful in humans? If so, why? If not, why not?
