

KEY

Practice - Heaps

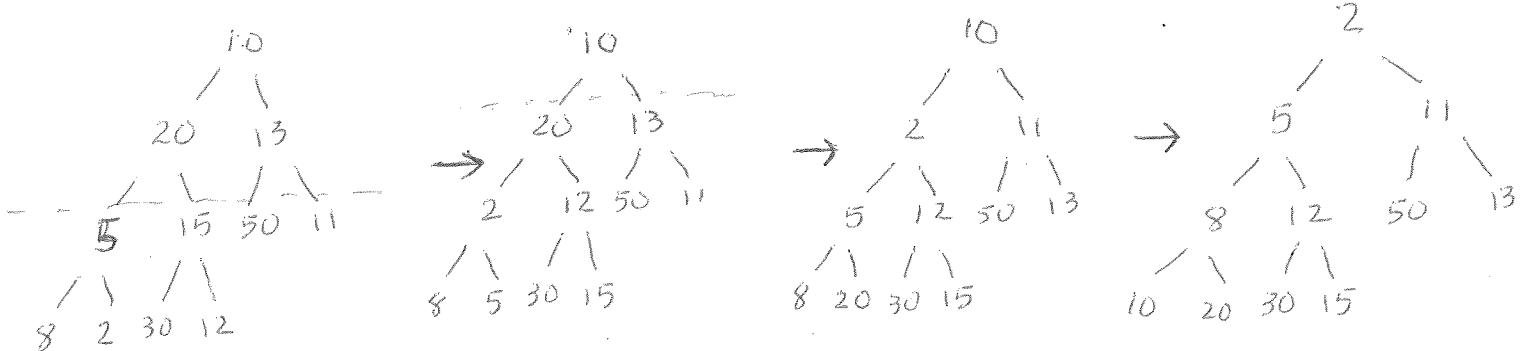

1. Inserting one item at a time, build a minheap using the numbers:

10 20 13 5 15 50 11 8 2 30 12

2. Start over, now using the linear algorithm, build a minheap using the numbers:

10 20 13 5 15 50 11 8 2 30 12

3. Given the following minheap, do three deleteMins/removes.
