

We need to adopt a broader view of what it means for researchers to fulfill their obligations to society. It is not enough for them to make findings and report them in the scholarly literature.

As citizens in a democracy, they must engage, and not just when their funding is at stake

-Cornelia Dean

New 2 credit fall seminar (ASTR599/BH597)

Communicating Science to the Public Effectively

Mondays 2:30-5:20 (split in two periods: lessons and group work)

Join a group of graduate student researchers from several departments to

develop and practice several analogies to distill your research

learn improvisation, acting games and lessons

produce animations or visualizations of your research

engage in weekly readings and discussions

create a variety of concise research promoting statements

hear from guest speakers on science communication

practice story-telling and ways of connecting with the public

Produce a 30-minute public talk on your research to deliver during the winter quarter's

Engage: The Science Speaker Series
