TAXONOMY	
Plant Family	
Scientific Name	Fabaceae Lindl. <sup>1</sup>
Common Name	Pea family <sup>1</sup>
Species Scientific Name	
Scientific Name	Lathyrus palustris L.1

macranthus (T.G. White) Fernald (LAPAM2), Lathyrus palustris L. var. meridionalis Butters & H. St. John (LAPAM3), Lathyrus palustris L. var. pilosus (Cham.) Ledeb. (LAPAP), Lathyrus palustris L. var. retusus Fernald & H. St. John (LAPAR)\(^1\)  Sub-species  Lathyrus palustris L. ssp. pilosus (Cham.) Hultén (LAPAP3)\(^1\), L. palustris subsp. nudicaulis (Willk.) P.W. Ball, L. palustris subsp. nudicaulis (Willk.) P.W. Ball, L. palustris subsp. palustris, L. palustris subsp. exalatus H.B. Cui\(^6\)  Cultivar  None Found  Common Synonym(s)  Lathyrus myrtifolius Muhl. ex Wild. (LAMY), Orobus myrtifolius Alef. (ORMY)\(^1\)  Common Name(s)  Slenderstem Peavine, Marsh Pea, Marsh Vetching, Wing-stemmed Wild Pea-vine\(^6\)  Species Code (as per USDA Plants database)		Lathyrus palustris L. var. myrtifolius (Muhl. ex Wild.) A. Gray (LAPAM), Lathyrus palustris L. var.
Lathyrus palustris L. var. meridionalis Butters & H. St. John (LAPAM3), Lathyrus palustris L. var. pilosus (Cham.) Ledeb. (LAPAP), Lathyrus palustris L. var. retusus Fernald & H. St. John (LAPAR)\(^1\)  Sub-species  Lathyrus palustris L. ssp. pilosus (Cham.) Hultén (LAPAP3)\(^1\), L. palustris subsp. nudicaulis (Willk.) P.W. Ball, L. palustris subsp. palustris, L. palustris subsp. exalatus H.B. Cui\(^6\)  Cultivar  None Found  Common Synonym(s)  Lathyrus myrtifolius Muhl. ex Wild. (LAMY), Orobus myrtifolius Alef. (ORMY)\(^1\)  Common Name(s)  Slenderstem Peavine, Marsh Pea, Marsh Vetching, Wing-stemmed Wild Pea-vine\(^6\)  Species Code (as per USDA Plants)  LAPA4\(^1\)		
(Cham.) Ledeb. (LAPAP), Lathyrus palustris L. var. retusus Fernald & H. St. John (LAPAR) <sup>1</sup> Sub-species  Lathyrus palustris L. ssp. pilosus (Cham.) Hultén (LAPAP3) <sup>1</sup> , L. palustris subsp. nudicaulis (Willk.) P.W. Ball, L. palustris subsp. palustris, L. palustris subsp. exalatus H.B. Cui <sup>6</sup> Cultivar  None Found  Common Synonym(s)  Lathyrus myrtifolius Muhl. ex Wild. (LAMY), Orobus myrtifolius Alef. (ORMY) <sup>1</sup> Common Name(s)  Slenderstem Peavine, Marsh Pea, Marsh Vetching, Wing-stemmed Wild Pea-vine <sup>6</sup> Species Code (as per USDA Plants)  LAPA4 <sup>1</sup>		
Sub-species  Lathyrus palustris L. ssp. pilosus (Cham.) Hultén (LAPAP3)¹, L. palustris subsp. nudicaulis (Willk.) P.W. Ball, L. palustris subsp. palustris, L. palustris subsp. exalatus H.B. Cui <sup>6</sup> Cultivar  None Found  Common Synonym(s)  Lathyrus myrtifolius Muhl. ex Wild. (LAMY), Orobus myrtifolius Alef. (ORMY)¹  Common Name(s)  Slenderstem Peavine, Marsh Pea, Marsh Vetching, Wing-stemmed Wild Pea-vine <sup>6</sup> Species Code (as per USDA Plants  LAPA4¹		
Sub-species  Lathyrus palustris L. ssp. pilosus (Cham.) Hultén (LAPAP3)¹, L. palustris subsp. nudicaulis (Willk.) P.W. Ball, L. palustris subsp. palustris, L. palustris subsp. exalatus H.B. Cui <sup>6</sup> Cultivar  None Found  Common Synonym(s)  Lathyrus myrtifolius Muhl. ex Wild. (LAMY), Orobus myrtifolius Alef. (ORMY)¹  Common Name(s)  Slenderstem Peavine, Marsh Pea, Marsh Vetching, Wing-stemmed Wild Pea-vine <sup>6</sup> Species Code (as per USDA Plants  LAPA4¹		
(LAPAP3)¹, L. palustris subsp. nudicaulis (Willk.) P.W. Ball, L. palustris subsp. palustris, L. palustris subsp. exalatus H.B. Cui <sup>6</sup> Cultivar  None Found  Common Synonym(s)  Lathyrus myrtifolius Muhl. ex Wild. (LAMY), Orobus myrtifolius Alef. (ORMY)¹  Common Name(s)  Slenderstem Peavine, Marsh Pea, Marsh Vetching, Wing-stemmed Wild Pea-vine <sup>6</sup> Species Code (as per USDA Plants  LAPA4¹		retusus Fernald & H. St. John (LAPAR) <sup>1</sup>
P.W. Ball, L. palustris subsp. palustris, L. palustris subsp. exalatus H.B. Cui <sup>6</sup> Cultivar  None Found  Common Synonym(s)  Lathyrus myrtifolius Muhl. ex Wild. (LAMY), Orobus myrtifolius Alef. (ORMY) <sup>1</sup> Common Name(s)  Slenderstem Peavine, Marsh Pea, Marsh Vetching, Wing-stemmed Wild Pea-vine <sup>6</sup> Species Code (as per USDA Plants  LAPA4 <sup>1</sup>	Sub-species	, , ,
subsp. exalatus H.B. Cui <sup>6</sup> Cultivar  None Found  Common Synonym(s)  Lathyrus myrtifolius Muhl. ex Wild. (LAMY), Orobus myrtifolius Alef. database)	Species Code (as per USDA Plants	LAPA41
	database)	

Geographical range	British Columbia  Washington  Idaho  Oregon
	Image Courtesy the USDA Website <sup>1</sup> Ranges outside of North America include Europe, including Britian, from Norway south and east to Northern Spain, Siberia and Japan <sup>7</sup>
Ecological distribution	Grows best in low praries, stream valleys, lakeshores, and other locations with sunlight and moist or wet soil. <sup>6</sup> Native to mountainous or arid areas of the Pacific Northwest <sup>2</sup>
Climate and elevation range	Natural Settings consist of: Annual Precipitation: 12.8" - 101.8"8 Summer Precipitation: 0.59" - 3.53"8 Cold Tolerance down to -25°C when dormant <sup>10</sup> Elevation: < 100 meters <sup>9</sup>
Local habitat and abundance	Abundant in marshy habitats <sup>6</sup> with full or partial sun, wet to moist condition, and soil with loam or sand. <sup>12</sup>
Plant strategy type / successional stage	Plant is spread via rhizomes and gravitational dispersal of seeds. <sup>6</sup> Tolerant of standing water, if not permanent, and will sprawl across the ground in the absence of some kind of structural support. <sup>12</sup> No serious problems with insects or disease. May become weedy. <sup>14</sup>

Ecotype	N/A
Propagation Goal	Plants
Propagation Method	Seed
Product Type	Container (plug) <sup>3</sup>
Stock Type	Adapted from <i>Lathyrus japonicus</i> : Deepot D40 (2.5" diameter and 10" deep) <sup>11</sup>
Time to Grow	Adapted from <i>Lathyrus japonicus</i> : 6 months <sup>11</sup>
Target Specifications	Adapted from <i>Lathyrus japonicus</i> : large plug with improved resilience to drying out during summer growing period <sup>11</sup>

Propagule Collection Instructions	Adapted from <i>Lathyrus japonicus</i> : collect legumes around July and August that have just dried out as that is when seed is ripe but not dispersed from pod yet <sup>11</sup>
Propagule Processing/Propagule Characteristics	Adapted from <i>Lathyrus ochroleucus</i> Hook.: 61 seeds per gram. As long as dormancy has not been broken, seeds have been reported to remain in the seedbank for many years. <sup>13</sup>
Pre-Planting Propagule Treatments	Adapted from <i>Lathyrus japonicus</i> : Dry at room temperature and thresh with brush machine with a solid mantle at low speed to avoid too harsh of scarification. Seperate seed from inert matter on a Clipper Office Tester with a 13 round top screen and no bottom screen with air at a medium-high setting. 11 Scarify seed or soak for 24 hours in warm water. 3
Growing Area Preparation / Annual Practices for Perennial Crops	Sow in standard soil-less seed mix growing media mixed with fine-grade perlite or vermiculite in 1" x 12" pots. <sup>4</sup> Cover seeds with 1/2" of soil as seeds require cool soil and darkness to germinate. <sup>5</sup> Alternately, for direct sowing, press seeds 2" deep in outdoor plot 18" apart in spring when temperatures no longer fall below 40°F. <sup>4</sup>
Establishment Phase Details	Inoculate with nitrogen-fixing bacteria and provide constant temperatures of 55°F to 65°F.3
Length of Establishment Phase	20 to 30 days <sup>3</sup> or 7 to 14 days <sup>4</sup>
Active Growth Phase	Place pots in a cold frame or unheated greenhouse. Cooler conditions are better as warm conditions will cause young plants to become soft and leggy. <sup>4</sup>
Length of Active Growth Phase	6 to 8 weeks <sup>3</sup>
Hardening Phase	None Found
Length of Hardening Phase	None Found
Harvesting, Storage and Shipping	None Found
Length of Storage	None Found
Guidelines for Outplanting / Performance on Typical Sites	Plant in full sun with 6 or more hours of direct sunlight a day in a moist area with good drainage. Often blooms in the Summer of first season. Plants get to be 4ft - 9ft tall and 1ft - 3ft in width. <sup>14</sup>

Other Comments	Flowers attract bees <sup>12</sup> , butterflies, and moths. <sup>8</sup>
