

New fall quarter class

Ocean 497B Introduction to modeling in Oceanography

Explores roles of ocean models in understanding past, current and future conditions in marine environments. Focus on active learning use of models to ask and answer questions about biological and physical/chemical processes in marine environments. 3 credits

Prereq: Ocean 200 or Ocean/Fish/Biol 250

Lecture: T 2:30–4:00, Computer lab sections: Th 10:30–12:00 or Th 2:30–4:00.
