MAPPING NETWORKS OF THINKING

Goal: to identify the central concepts/ideas of today's readings and start working to see the networks they form

- For each of the readings:
    - *10 min*: in pairs (inside/outside circle) discuss reading to generate list central concepts
    - *5 min*: choose 5 most important to the questions of this course—write author/essay and concept/idea on post-it using language of the reading (each person make their own set)

- Take your fifteen post-its/concepts and work together with each set to
    - *10 min*: connect related ideas/concepts
        - which are similar—write new post-it with title that encompasses both
        - which are different perspectives on same issue— write new post-it with title that encompasses both
    - group according to focus of each of today's one-pagers
